2017 Spring Waste Tire Collection Events Now Underway

Waste tire collection events for counties in the Cumberland Valley, Gateway, Big Sandy and Kentucky River Area Development Districts (ADDs) began March 16th and will continue until June 24th, 2017.

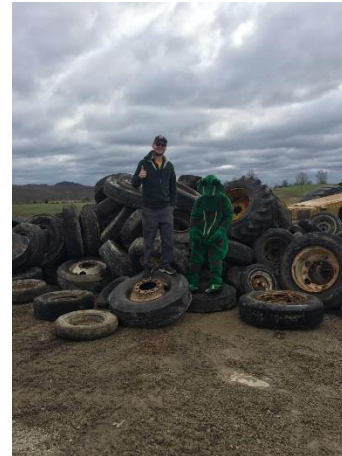

Collection events are held on a rotating schedule so that every county hosts an event every three years.

Kentucky's Waste Tire Program is mandated by KRS 224.50-850 and established in 1998 and funded by a \$1 fee per new tire sold in Kentucky.

Waste tire collection events are open to all Kentucky residents EXCEPT tire retailers, salvage yards or recycling facilities.

To find out when and where your county will be conducting a waste tire collection event visit the Recycling and Local Assistance Branch web site <http://waste.ky.gov/RLA/grants>.

Jelly Bean the Frog attends Rowan County Waste Tire Collection Event

On April 7th 2017 Rowan County hosted the State funded waste tire collection event at the Farmers Fire Department on KY 801. During the event the Community Recycle Center mascot stopped by to hang out for a few minutes. "Jelly Bean", the recycling frog was chosen as the center's mascot because the frog species is an indicator of the health of our environment. Jelly Bean serves as a mascot for local events, parades, festivals, and interacts with children during facility tours.

Accompanying Jelly Bean was William Collin Alexander, a lifelong resident of Morehead and manager of Morehead Community Recycle Center (MCRC). William is a 2011 graduate of Rowan County Senior High School and a 2016 graduate of Morehead State University and still lives on the same family farm that he grew up on.

The Community Recycling Center, was reformed in 2000 as an "Interlocal Agreement" between Rowan County, the City of Morehead, and Morehead State University. Their mission is to offer recycling services to the community in an effort to return usable materials to the marketplace and to lessen the amount of waste buried in their landfill. MCRC offers a variety of services that make disposal of recyclables both convenient and environmentally sound.
